Practical workshop 1 (PW1): Gram-negative bacilli bacteria: Enterobacteria

1- Introduction	1
2- Objectives.....	2
3- Techniques.....	2
3-1- Gram staining	2
3-2- Catalase test.....	3
3-3- Oxydase test	4
3-4- Glucose/lactose catabolism	4
a. On Kligler Iron Agar (KIA)	4
b. On MacConkey Agar and EMB Agar	6
3-5- Mannitol catabolism and mobility.....	8
3-6- API® 20E Gallery	11

Practical workshop 2 (PW2): Other Gram-negative bacilli bacteria: *Pseudomonas aeruginosa*

1- Introduction	13
2- Objectives.....	14
3- Techniques.....	14
3-1- Gram staining	14
3-2- Catalase and oxidase tests	14
3-3- Mobility test	15
3-4- Pigment production test.....	17
3-5- Glucose utilization test (O/F test of Hugh & Leifson)	18

Practical workshop 3 (PW3): Gram-positive cocci bacteria: *Staphylococcus aureus*

1- Introduction	20
2- Objectives.....	20
3- Techniques.....	20
3-1- Gram staining	20
3-2- Catalase test.....	21

3-3-	Mannitol fermentation.....	21
3-4-	Coagulase test.....	22
3-5-	DNase test	23
3-6-	Hemolysis activity.....	25
3-7-	API® Staph Gallery	26

Practical workshop 4 (PW4): Gram-positive cocci bacteria: Lactic acid bacteria: *Lactococcus* sp and *Enterococcus* sp

1-	Introduction	28
2-	Objectives.....	28
3-	Techniques.....	28
3-1-	Gram staining (non-differential test).....	28
3-2-	Catalase test (non-differential test).....	29
3-3-	Fermentative type (non-differential test).....	29
3-4-	Arginine hydrolysis test (non-differential test)	30
3-5-	Growth at different temperatures (differential test).....	32
3-6-	Growth in salt (NaCl tolerance test) (differential test).....	32
3-7-	Sherman's blue test (differential test).....	33
3-8-	Fermentation profiles (carbohydrate utilization tests) (differential test).....	34
	References.....	37
